Please answer the following:

Please describe of what you would like to accomplish with the landscaping in your front yard.

Is the yard manually or automatically irrigated?

Are you supportive of xeric landscape concepts? (These promote the use of drought tolerant species to promote water conservation and plant material suitable for a semi-arid climate.)

Grant monies cannot be used for installation costs. What sweat equity or other resources do you have to install the landscape materials? Planting assistance can be requested if you have special needs.
